Clark Tanks full colour chart available

In today's housing market where space is at a premium, the SLIMtech⁵⁰⁰⁰ encompasses some unique features, leading the market in a new era of poly slimline water tanks.

Combining visual appeal with industry-leading integral strength, the Slimtech 5000 is designed to suit limited space applications, while its durability, functionality and light weight allows the homeowner to change the tank location with the changing style of their home.

Produced as a single piece with a ribbed profile, the Slimtech 5000 is compact, strong and aesthetically pleasing. The ribbed profile ensures

maximum integral strength, which means that full, or empty, the Slimtech 5000's shape remains the same. This revolutionary technology means the Slimtech 5000 is very space efficient and eliminates the need for external support braces or unsightly designs in order to maintain strength and true usable capacity. The Slimtech 5000 is the new era of slimline poly tanks.
